JEWELLERY GUIDE

GUIDE TO TYPES OF RINGS

WEDDING – Russian Wedder

A single metal or combination of metals band, usually without gemstones but if gemstones are inserted they must be flush mounted (i.e. gemstones are not set above the surface of the band). If gemstones are set above the band then it is a multi-stone ring.

**SIGNET**

A ring that has a large flat face of precious metal onto which initials have been or could be engraved - may also have gemstones flush mounted. If it has an emblem engraved (other than initials) then it is a crest ring.

**CLADDAGH – Clasped Hands Ring**

A ring on which there are two hands clasped. The hands may be holding one or more hearts.

**SOLITAIRE – Single Stone Ring**

A ring that has a single gemstone (e.g. diamond, ruby, sapphire) mounted on the face but not being a pearl, opal, cameo, onyx, or jade etc). If there are any additional stones set then it is a multi-stone ring.

**MULTI-STONE - Anniversary - Eternity - Cluster**

Any ring that has more than one gemstone set in it which is not flush set (embedded) in the band as in a wedding ring.

Stones can either be all one size or of varying sizes and in any design. Anniversary Ring - Generally a multi-stone ring - not a true type of ring. Eternity Ring - Generally a multi-stone ring set in a single row (row can be straight or curved etc) - not a true type of ring.

**LOCKET – Open Top – Poison Ring**

A ring which has a hinged lid which may be lifted to expose a cavity inside. It may have a picture or other item inserted in the cavity.

CAMEO

A ring with a coloured layer stone setting, usually a pink or pink and white stone, with a small piece of relief carving in the stone. Usually does not have gemstones set in it.

**OPAL**

A ring with a large opal setting - may be adorned with other gemstones but the opal is the main feature.

DRESS

A ring that has a large flat surface face of either metal or semi-precious stone. It may have precious stones flush set into it. Usually of jade or onyx.

**PEARL**

A ring that has one or more pearls set into it - it may be adorned with other precious stones.

**COIN**

A ring onto the face of which a coin has been mounted.

CREST – Seal Ring – Coat of Arms Ring

A ring that has a family coat of arms, crest or shield etched onto the face. Once used to imprint the family crest into sealing wax.

**MARCASITE**

A distinctive type of ring made by cutting and shaping 'faceting' metal (e.g. nickel or iron ore) and then highly polishing it so that it has the appearance of gemstones - usually grey in colour.
