Travelling across South Australia in a caravan or camper trailer?

THINK!

ROAD SAFETY

South Australia is full of amazing and picturesque locations and what better way to truly immerse yourself than to enjoy it in a caravan or camper trailer? Before setting out, consider the following safety tips:

- all brake lights, indicators, clearance lights and tail lights are in good working order
- · tyres are in good condition and inflated to their correct pressure
- all cupboard and fridge doors are securely locked
- all gas cylinders are turned off
- the jockey wheel, entry steps and levelling jacks are wound up
- items stored in the caravan or camper trailer are evenly distributed
- safety chains are crossed and attached securely by rated "D" shackles
- split pins (also known as "R" pins) are in place and secure
- all mirrors (including extension mirrors) have a clear view of the road and traffic ahead, behind and to each side of the towing vehicle.

It is important to understand the dynamics when overtaking or being overtaken, so you can help minimise your caravan swaying effects.

Keep an eye on your rear-view mirrors to know exactly when another vehicle may overtake. This will allow you to prepare for any sideways movement. Increasing the gap between you and the overtaking vehicle and moving over in your lane will also reduce the effects.

Easing off the accelerator so overtaking vehicles can pass quicker is not only courteous but safe. If you are travelling slower than other vehicles consider pulling over and letting those vehicles pass.
